

Command	GPARAMETERS
<b>PURPOSE</b>	List the actually used display parameters
<b>FUNCTION</b>	The display parameters actually used for the last graphic display are listed. The display parameters are the optional parameters of the commands GDISP, GPLOT, GOVER, GPRESET, GSET. This list of display parameters is sufficient to fully specify the graphic presentation of the figure in a new SATAN session.
<b>REMARKS</b>	The text which is listed as output of the command GPARAMETERS is internally prepared with each GDISP, GOVER or GPLOT command. This text is added to the GRAF dataset by the command <a href="#">GSAVE</a> .
